

Venture Scout (Internship)

Location: Trondheim, Norway (NTNU Campus)

About Antler

Antler is a global early-stage venture capital firm that backs exceptional founders from day zero. We manage a €100M pre-seed fund in the Nordics and invest in the next generation of groundbreaking companies across deep tech, software, and frontier innovation. With offices in **30+ locations worldwide**, we're on a mission to help build the defining companies of tomorrow — from the first idea to global scale.

Role Overview

As a Venture Scout at Antler, you'll be our connection to NTNU's vibrant community of builders, innovators, and entrepreneurs. You'll help us spot and connect with talented founders, student startups, and exciting projects on campus. This role is great for someone who's genuinely curious about startups, technology, and venture capital — and who enjoys meeting ambitious people and hearing their ideas.

You'll work closely with Antler's Oslo investment team, who will onboard and support you throughout the internship. While we'd love to have you join us in Oslo for at least a week, **the onboarding setup is flexible**.

What You'll Do

- Scout and identify high-potential founders and early-stage ventures at NTNU.
 - Join hackathons, demo days, and tech events to discover promising teams, ideas, and individuals.
 - Build relationships with students, professors, and innovation hubs across campus.
 - Provide the Antler team with insights and recommendations on **great founders and teams**.
 - Represent Antler as an ambassador on campus, helping build visibility and excitement around **building a VC-backed startup**.
-

Who You Are

- A current NTNU student (ideally in your final or second to last year) with a strong interest in startups, tech, or innovation.
 - Curious, proactive, and entrepreneurial — you enjoy connecting people and ideas and can easily spot potential in others.
 - Well-connected across NTNU's top student communities and societies.
 - A clear communicator with good analytical and relationship-building skills.
 - Deeply interested in technology trends — from AI, robotics, and climate tech to biotechnology and others shaping the future.
 - Must be fluent in English.
 - Some understanding of venture capital is a plus, but not required.
-

What We Offer

- **Hands-on experience in VC:** Learn what makes great founders stand out and how investment decisions are made.
- **Pathway to a career at Antler:** Top-performing scouts may be offered full-time roles after graduation — for example, in the investment or community operations teams.
- **Mentorship & access:** Work directly with Antler's Partners, Investment Managers, and portfolio founders in Oslo.
- **Global exposure:** Connect with founders, advisors, and investors across our 30+ offices from Singapore to New York.
- **Unique opportunities:**
 - Join exclusive Antler events, pitch days, and founder gatherings.
 - Get access to Antler's global founder and investor network, tools, and insights.
 - Play a part in shaping the next generation of Nordic startups — helping founders build companies that define the next decade.

The role is flexible around your studies — expect varying hours week to week, with up to part-time (max. 20 hours) commitment during busier periods.

How to Apply

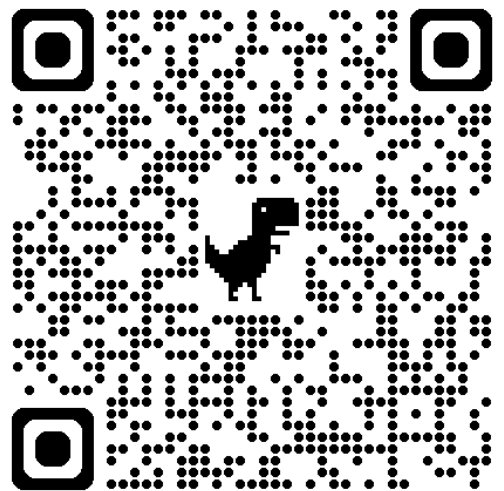

Interested in becoming a Venture Scout?

Submit a quick application (it takes less than 2 minutes) through our short online form:

👉 <https://forms.gle/UCuP8S9Jdd3yw5TF7>

Note: We're mainly looking for final- and second-to-last-year students — but if you're earlier in your studies and believe you can contribute meaningfully, we'd still love to hear from you.

Applications are reviewed on a rolling basis, so we encourage you to apply early.
